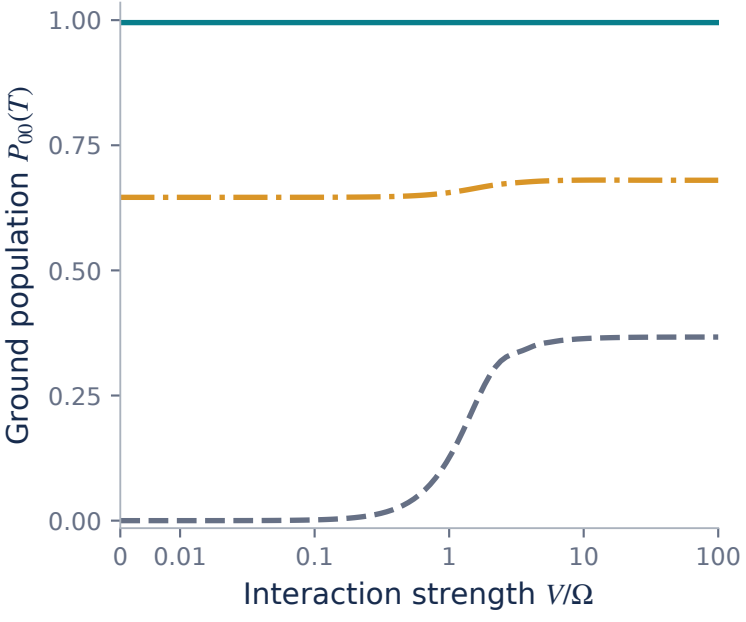
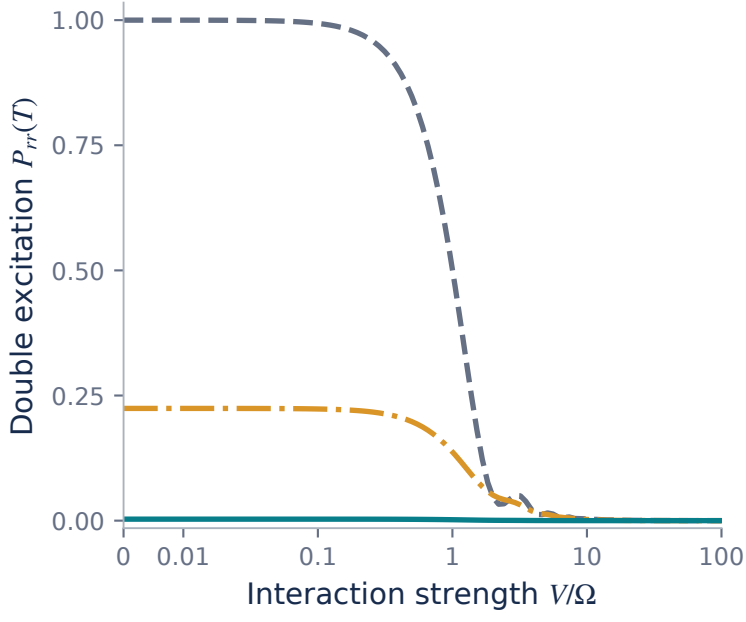
06 Measurement inhibition and interaction blockade

$\Omega/2\pi = 1\,\mathrm{MHz}$ · $\Delta = \phi = 0$ · $\rho_0 = |00\rangle\langle 00|$ · $T = 0.5\,\mu\mathrm{s}$

a Protection of the initial state



b Suppression of double excitation



Unmeasured · $M = 10$ · $M = 1000$

Strong V inhibits double excitation without freezing $|00\rangle$. Matched $M = 0$ controls separate the mechanisms.
