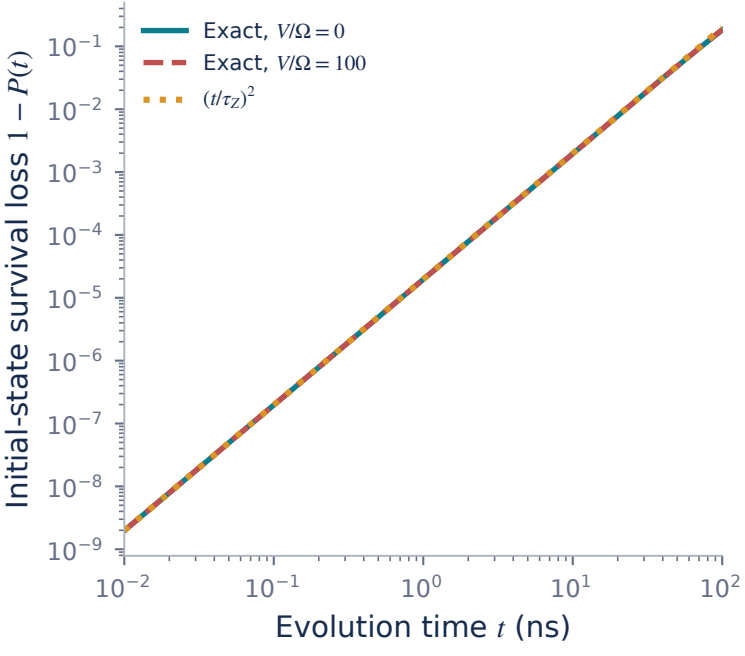
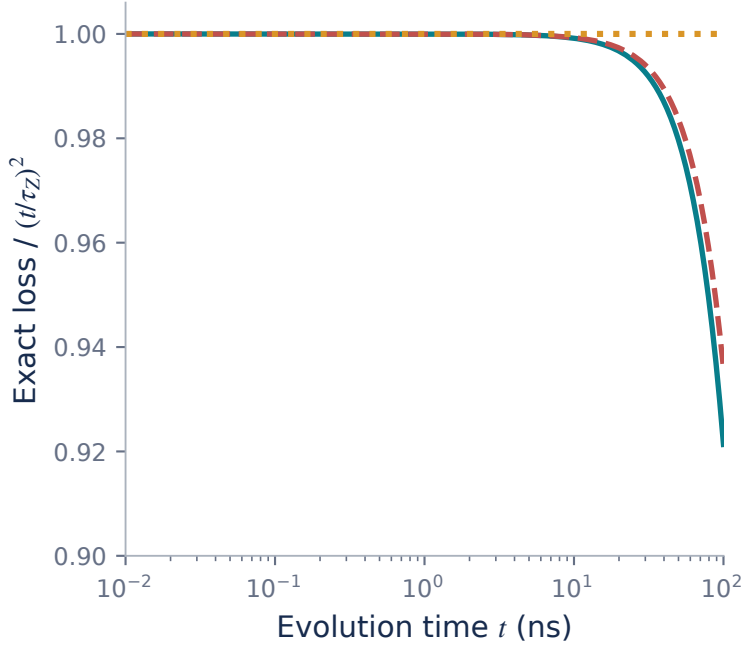
04 The quadratic origin of Zeno suppression

$\Omega/2\pi = 1\,\mathrm{MHz}$ · $\Delta = \phi = 0$ · $\rho_0 = |00\rangle\langle 00|$

a Short-time exponent: 2



b Validity of the leading term



$\tau_Z = \sqrt{2}/|\Omega| = 225.08\,\mathrm{ns}$ for every V. The quadratic window depends on higher Hamiltonian moments.
