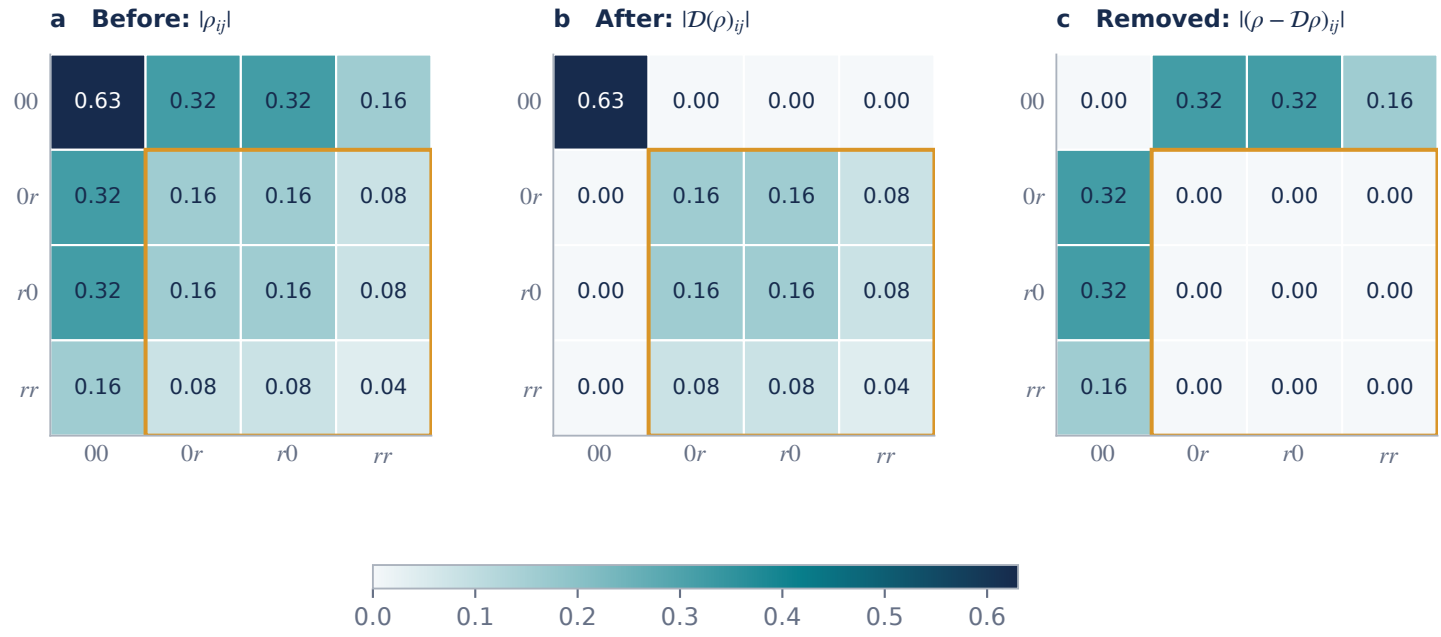
07 What a non-selective measurement removes

$\Omega/2\pi = 1\,\mathrm{MHz}$ · $\Delta = \phi = 0$ · $\rho_0 = |00\rangle\langle 00|$ · $V = 0$ · $t = 0.15\,\mu\mathrm{s}$



$P = |00\rangle\langle 00|$, $Q = I - P$: only cross-sector coherences vanish. The outlined Q block remains intact; magnitudes shown.
